There is a War on America underway, and it threatens everything we hold dear. In mortal danger: our freedoms, our self-government, our republic—even the minds of our children. This Deep State war against America uses a variety of weapons such as the government education system, climate-change alarmism, “free trade” deals, and more. But while they all may seem unrelated at first glance, they are all leading us to the same endpoint: what Deep State leaders refer to as the “New World Order.”

Mr. Alex Newman will take you inside the Deep State and give an overview of its goals, while emphasizing that constitutionally limited government abhors this type of untouchable bureaucracy and invisible machinations. But the Constitution knows no greater friend than The John Birch Society, so learn your role in this battle.

Mr. Alex Newman
